American eel

Physical Characteristics

Area - 57 acres

Maximum depth - 33 feet

Principal fisheries: White perch, chain pickerel

Temperatures:

Surface - 68⁰F

30 feet - 52⁰F

Dutton Pond should continue to be managed for warmwater fish species. The cold water layer is deficient in dissolved oxygen and the abundance of warmwater competitors precludes any trout management.

Recently, largemouth bass have been discovered in Dutton Pond. It is unknown if this species has become established.

Surveyed - August, 1941

Revised - 1953, 2000
